1 PROFESSIONAL SUMMARY

High Performance Computing and Quantum Computing Master's candidate with a background in computational engineering and Python development. Passionate about applying high-performance computing, scientific simulation to solve complex engineering challenges. Seeking to contribute to HPC Solutions's innovative projects.

2 TECHNICAL SKILLS

High Performance Computing (HPC),
Quantum Computing,
OpenMP,
MPI,
C++,
SciPy,
Qiskit,
Python

3 PROFESSIONAL EXPERIENCE

Working Student - HPC Software Developer <i>Tech Computing GmbH</i>	<i>Munich, Germany</i> 2023 - Present
- Developed and optimized Python/NumPy benchmark pipelines for parallel computational solvers. - Utilized Git, GitHub Actions, and Linux cluster nodes to execute automated performance tests. - Collaborated with senior engineers on benchmarking HPC algorithms using OpenMP and MPI.	

4 EDUCATION

M.Sc. High Performance Computing Quantum Computing Technical University	2023 - Present 1.3
B.Sc. Mechanical Engineering Technical University	2019 - 2023 1.6

5 KEY PROJECTS

Parallel Fluid Simulation Solver Designed a 2D Navier-Stokes solver using C++ and MPI, achieving sub-linear speedup on multi-node computational clusters.
Quantum Optimization Benchmarking Simulator Implemented VQE and QAOA algorithms using Qiskit and Python to solve combinatorial graph optimization problems on simulated hardware.

6 RESEARCH INTERESTS

High Performance Computing,
Quantum Computing,
Parallel and Distributed Systems

7 LANGUAGES

English (Fluent),
German (Intermediate)
