1PROFESSIONAL SUMMARY

High Performance Computing and Quantum Computing Master's candidate with a background in computational engineering and Python development. Passionate about applying quantum computing, high-performance computing to solve complex engineering challenges. Seeking to contribute to Quantum Labs's innovative projects.

2TECHNICAL SKILLS

Python,
Quantum Computing,
Qiskit,
High Performance Computing (HPC),
SciPy,
Pandas,
OpenMP,
NumPy

3PROFESSIONAL EXPERIENCE

Working Student - HPC Software Developer <i>Tech Computing GmbH</i>	<i>Munich, Germany</i> 2023 - Present
- Developed and optimized Python/NumPy benchmark pipelines for parallel computational solvers. - Utilized Git, GitHub Actions, and Linux cluster nodes to execute automated performance tests. - Collaborated with senior engineers on benchmarking HPC algorithms using OpenMP and MPI.	

4EDUCATION

M.Sc. High Performance Computing Quantum Computing Technical University	2023 - Present 1.3
B.Sc. Mechanical Engineering Technical University	2019 - 2023 1.6

5KEY PROJECTS

Quantum Optimization Benchmarking Simulator Implemented VQE and QAOA algorithms using Qiskit and Python to solve combinatorial graph optimization problems on simulated hardware.
Parallel Fluid Simulation Solver Designed a 2D Navier-Stokes solver using C++ and MPI, achieving sub-linear speedup on multi-node computational clusters.

6RESEARCH INTERESTS

Quantum Computing,
Parallel and Distributed Systems

7LANGUAGES

English (Fluent),
German (Intermediate)
